**********DRAFT**********

Testing C code with Ultibo Bare Metal, Ultibo TFTP and Ultibo Bitmaps

01/24/17

Goal: This is hopes of improving the speed of computing the JPEG2000. The RPi2B or RPi3B will run Ultibo Bare Metal.

To transfer images over an Ethernet connecttion to a RPi2B or RPi3B.

Perform the JPEG 2000 lifting step which is the firts step in the JPEG2000.

The C code that performs the DWT Lifting Step runs on x86_64 6 core is considerably faster.

time ./liftmain lena_rgb_512.png

real 0m0.090s
user 0m0.043s
sys 0m0.009s

The C code that performs the DWT Lifting Step runs on the x86_64 dual core and RPi3B is approximately the same.
On x86_64 dual core
time ./liftmain lena_rgb_512.png

real 0m0.356s
user 0m0.209s
sys 0m0.040s

On a RPi3B
./ltime ./liftmain lena_rgb_512.png

real 0m0.380s
user 0m0.230s
sys 0m0.010s

Status: Topleft is where the C routine is being called. Bottomleft is a 512 x 512 bitmap
In the file test.c the contents of lifing.c
In the topright is the tftp process.
ultibo-tftp

A reasonably quick method of transferring files in an Ultibo project.
It uses Trival FTP based on RFC 1350
Approx upload times around 16 secs for kernel7.img of approx 2.2 MB

tftp 192.168.1.185
tftp> binary
tftp> put grn-out.32t
Sent 1048576 bytes in 4.0 seconds

tftp> get grn-out.32t xx
Received 1048580 bytes in 4.0 seconds
tftp> quit

https://github.com/pjde/ultibo-tftp.git

```
extern  void    singlelift(int rb, int w, int * const ibuf, int * const obuf);
extern  void    ilift(int rb, int w, int * const ibuf, int * const obuf);
extern  void    lifting(int w, int *ibuf, int *tmpbuf);
```

This is needed to add the fpc compiler to the PATH.

```
export PATH=/home/pi/ultibo/core/fpc/bin:$PATH
echo $PATH
/
home/pi/ultibo/core/fpc/bin:/usr/local/sbin:/usr/local/bin:/usr/sbin:/usr/bin:/sbin:/bin:/usr/local/games:/u
sr/games

arm-none-eabi-gcc -O2 -mabi=aapcs -marm -march=armv7-a -mfpu=vfpv3-d16 -mfloat-abi=hard -c
test.c

arm-none-eabi-ar rcs libtest.a test.o

fpc -vi -B -Tultibo -Parm -CpARMV7A -WpRPI2B @/home/pi/ultibo/core/fpc/bin/rpi2.cfg -O2
LibCTestRPi2.lpr
```

./build_liftmain.sh compiles lifting.c & liftmain.c --> liftmain

```
iftmain lena_rgb_512.png
        red-out.32t
```

line 101 lifting.c const int LVLS = 1; performs 1 level forward DWT

lines 230-246 in lifting.c when commented does not perform the inverse DWT.

```
/*
        for(lvl=(LVLS-1); lvl>=0; lvl--) {
                int     offset;

                w <<= 1;

                if (lvl)
                        offset = ov[lvl-1];
                else
                        offset = 0;
                ip = &ibuf[offset];
                tp = &tmpbuf[offset];

                ilift(rb, w, ip, tp);
```

```
        ilift(rb, w, tp, ip);
}
*/
```
